

Mac Beagan

Senior Software Engineer · React & React Native

Munich, Germany | cor@macbeagan.me
macbeagan.me | github.com/cormacbeagan | linkedin.com/in/mac-beagan

PROFILE

Senior software engineer with five years of React, React Native and TypeScript, most of it in regulated environments: NHS clinical systems, a national government health app with 30,000+ downloads, and medical records for professional sport. I build mobile apps end to end with Expo, from offline sync and native modules through to the accessibility, security and clinical safety work needed to get them approved. Freelance since 2021, based in Munich.

SKILLS

Mobile	React Native, Expo (EAS, config plugins, native modules), SwiftUI / watchOS, offline-first sync
Web	React 19, TypeScript, Redux Toolkit, Angular, Storybook, Power BI
Backend	Node.js / Express, Firebase, Azure Functions, SignalR, Strapi, Medplum (FHIR R4)
Testing	Jest, React Testing Library, Detox, Maestro, Playwright
Quality	WCAG 2.2, OWASP MASVS, penetration test remediation, clinical safety (DCB0129/DCB0160)
Tooling	Turborepo, pnpm, Azure DevOps, devcontainers, AI coding agents

EXPERIENCE

06/2021 – present	Senior Software Engineer (Freelance) · Daysix Ltd Digital health and product agency, Scotland · remote
10/2025 – present	Daysix Health — FHIR-native self-management platform for NHS Scotland and third-sector care providers - Founding engineer and top contributor in a team of six developers and three designers. React, React Native, TypeScript and Medplum in a pnpm/Turborepo monorepo. - Designed the role-based access control model for the whole platform. - Integrated ScotAccount, the Scottish Government’s digital identity service, across per-organisation subdomains. - Introduced AI-assisted development to the team, with shared agent rules, guardrails for working on clinical code and devcontainers so every agent runs in the same isolated environment.
2021 – present	The Trauma App — Real-time trauma case recording in emergency departments - In use at five hospitals, including Alder Hey Children’s Hospital. Maintained and extended since go-live in 2021, sole app engineer since 2025, and moved the app from bare React Native to Expo and React 19. - Offline-first data sync over SignalR with a .NET and Azure Functions backend. - Work directly with ED clinicians on new features, such as a drag-and-drop team screen showing who is present, their role and when they arrived. - Built the Angular dashboard and Power BI reporting used by hospitals and audit bodies. - Took the app through DCB0129/DCB0160 clinical safety assurance (hazard log, safety case), NHS security plans and penetration test fixes. MyCare.scot (Digital Front Door) — National app giving the public access to their health and social care records - Lead mobile developer on a six-month Expo build, embedded in the NHS Scotland digital team. 30,000+ downloads. - OWASP MASVS compliant and penetration tested. Built the Express service that handles authentication for the native app. Bookbug (Scottish Book Trust) — Scotland’s national early-years reading app - Led the rewrite in Expo with EAS builds and replaced a legacy Rails backend with a Strapi 5 CMS.
2022 – present	1837 (The Borders Distillery) — App for cask owners Main developer. Expo, Firebase and push notifications.

12/2022 – present

React Native Consultant (Freelance) · [ScribePro](#)

Injury, medical and wellbeing records for professional sports teams · remote

- Work across a pnpm/Turborepo monorepo with an Expo app for team staff, React web apps for coaches, athletes and analytics, shared design-system and data packages, and a Firebase backend.
- Coordinated the move from bare React Native to Expo, including custom config plugins, a local Expo native module, MMKV and SecureStore storage, protected routes and deep linking.
- Built core product features, including data-entry forms, summary views, document browsers and PDF/CSV exports.
- Shared mobile and web components documented in Storybook, forced updates for outdated app versions, SMS sign-in through Twilio and bulk data import.

01/2016 –
06/2021

Hostel Manager · [Jaeger's Hostel](#)

Munich

- Managed a youth hostel in Munich. Taught myself web development through The Odin Project and Codecademy before going freelance in 2021.

SIDE PROJECT

01/2022 – present

RefsWatch — Rugby match management for iPhone and Apple Watch · [App Store](#)

- The referee runs the match from the phone or watch while a pitchside scoreboard, public results site and admin portal update in real time. My rugby club uses it on match days.
- SwiftUI watch app bridged to the Expo app through a custom native module, a Raspberry Pi scoreboard on 4G, and Firebase Realtime Database, Firestore and Cloud Functions.
- Turborepo monorepo with one Redux Toolkit store shared by the web and native apps.

EDUCATION

2012
2005

MA (Hons) Politics and Philosophy, 2:1 · University of Glasgow
